

IN THE SPECIFICATION:

Please amend the paragraph on page 18 from lines 17 to 24 as follows:

--As illustrated, communications system 180 preferably includes integrated PBX station 186 including, but not limited to, voice mail, automated attendant, conferencing and other functions, and also router 190, data switch 188, processor 184 (which serves to control the various components and subsystems of communications system 180, etc., as may be more fully appreciated from co-pending App. Ser. No. 08/09/055,072 filed on April 3, 1998, now U.S. Patent No. 6,181,694. As illustrated in the referenced co-pending application, a variety of WAN and other network services/resources may be coupled to communications system 180, as may be desired for the particular office/work environment and infrastructure.--

Approved by Examiner.
